**GENERAL SUMMARY:**

The Statistical Office in Poland (GUS) in its December communiqué raised 2005 rapeseed production by 0.1 MMT to a total production of 1,480,000 tons. The revision was due to somewhat greater rapeseed acreage and yields from the September 2005 preliminary estimates. Thus, 2005 rapeseed production is now 9.0 percent lower than the record 2004 crop.

When compared with FAS/Warsaw's previous reported PSD data, rapeseed production is 0.2 MMT larger. It is expected that the increased supplies will be exported.
